

We are a Tier IV datacenter. We have a 100% uptime record since our inception. Our SLAs are unmatched in the business. We have a team of experts standing by day and night. These are just some of the reasons why our clients chose CtrlS. But don't take our word for it; see for yourself, what they have to say. And if you believe CtrlS could be exactly the datacenter you are looking for, do give us a call.

Citi has demonstrated an expert understanding of our DR requirements. Their unique built-to-suit infrastructure gives us the flexibility to customize the infrastructure based on our specific requirements. Moreover their track record of 100% uptime since inception and world-class infrastructure makes it natural for companies in the financial services vertical to go with them.

Indian Overseas Bank

CtrlS has what it takes to be a world class datacenter. Their unique Six Zone Security in the datacenter gave us the confidence to go for datacenter outsourcing. Their expertise in infrastructure and IT Services helped them to quickly deliver a tailor-made solution for us.

CtrlS, has created world-class web hosting services with a robust network, excellent infrastructure, security and reliability, ideal for our enterprise level application. We are completely satisfied with the cost effective web hosting services.

We are manufacturers and exporters of bicycle tyres and tubes. We would like to go on record to say that our association with CTALS over the past three years has proved an excellent Cost Performance ratio and given us a client-friendly environment with no single point of failure.

HARTEX

The Choice of millions of users

CTALS displayed high levels of commitment during this project. The team completely understood that every second of network downtime was a loss of business, customers and revenue for us and ensured that we were supported with absolute error proof infrastructure.

We function in the critical space of voice enabled e-mails. We have also hosted a special feature with visuals. We are very certain that we could undertake these due to the continued and reliable backend support from CtrlS. It is not only reliable but its staff is also proactive. Our experience with them has been very fruitful.
